

ESG data analysis

Does your company disclose the key data
investors & ranking agencies are looking for?

OUR OFFER

We believe in the value of environmental, social, and governance-related data (ESG). Do you already publish a sustainability report or are you just starting from scratch? We can help you to compile the data that investors are looking for.

ESG Gap Analysis

Development of a specific list of relevant ESG data that your company should disclose to improve its sustainability ranking and attractiveness to investors.

ESG Data Book

Professionally designed presentation of ESG data, with figures to share with ranking agencies and responsible investors.

ESG Promotion

Practical support and guidance to increase your company's value among selected ESG ranking agencies and sustainability indices.

ESG DATA ANALYSIS

The increasing volume of regulations and standards in the market, including the EU Commission action plan on sustainable finance, the Task Force on Climate-related Financial Disclosures (TCFD) and the Sustainability Accounting Standards Board (SASB), and the growing recognition of the value of sustainable investment highlight the importance of corporate reporting on ESG topics.

Identifying and reporting on topics relevant to investors increases the potential to improve transparency, simplify investment decisions and reduce risks for both corporates and investors.¹ Research has proven that the integration of ESG within a corporation increases the overall value of the firm.²

Most popular ESG standards, rankings and ratings

- Sustainability Accounting Standards Board (SASB)
- Carbon Disclosure Project (CDP)
- Morgan Stanley Capital International (MSCI)
- RobecoSAM Corporate Sustainability Assessment
- Sustainalytics' ESG Risk Ratings
- ISS-Oekom Corporate Rating
- Vigeo Eiris Sustainability Rating
- Bloomberg ESG Disclosure / Performance Score
- DowJones Sustainability Index (DJSI)
- Thomson Reuters ESG Research Data
- FTSE Russell's ESG Ratings

ESG Gap Analysis

We start with an analysis of the status quo: What is the scale and sector of your business? Who are your competitors? Which sustainability standards are relevant to your business sector? Which rankings are you primarily focused on?

Based on your business sector and key markets, you can select the most relevant standards or agencies to your work.

As a result, we present you a detailed ESG gap analysis which provides:

- Topics and indicators that you need to include in your reporting
- Detailed instructions on how to compile the data by indicator
- Good practice examples from your peers on how to report

ESG Data Book

If you are ready to publish the data, we can help you to compile the data and to present it in a well designed ESG data book. You can choose different design types aligned with your corporate identity. ESG data books can highlight the key topics with charts.

FATALITIES AT MANAGED OPERATIONS

Performance

We are saddened to report that during 2019, seventeen people lost their lives at our operations (2018: 13)

TOTAL WATER WITHDRAWN

Performance

In 2019, we withdrew 0.9 M/m³ of water (2018: 0.8 M/m³). The increase is due to significantly increased precipitation.

TOTAL ENERGY USE

Performance

During 2019, our total energy use of 210PJ was a slight increase on the 209PJ reported in 2018.

CARBON EMISSIONS INTENSITY

Performance

We are on track to exceed our target to reduce greenhouse gas emission intensity by 5% in 2020 compared to a 2016 baseline. To date, we have reduced our emission intensity by

-9.7%

COMMUNITY INVESTMENT SPEND

Performance

During the year, we spent US\$ 90 million on community development programmes

ESG Promotion

To be considered and ranked by the leading agencies you may need additional support.

Costs and duration of our services depend on the number of standards and rankings you wish to cover. For an offer, please contact us or our sustainability partner in your country.

We can

- Help to access the agencies
- Support data entry or contact them on your behalf
- Lead the dialogue with them
- Provide contextual information to the agency if data is incomplete or missing

SchweryCade

Acting Responsibly

SchweryCade is a Swiss-based social entrepreneurship. We support organisations in developing a strategic approach to social responsibility, considering the economic, social, and environmental impacts. We believe that responsible action is the basis for sustainable development.

For our training sessions and services, we work in partnership with internationally recognised standards organisations such as the Global Reporting Initiative (GRI), AccountAbility, and the Sustainability Accounting Standards Board (SASB). Since 2011, we have offered over 60 GRI certified training courses. We have been a licensed AccountAbility Assurance Partner since 2015 and, in 2019, we signed a partnership with SASB to strengthen our focus on communicating ESG data for investors.
